

IC Warehouse Parts Transfer Solution (Wireless) for Sage BusinessWorks

The C&A IC Warehouse Parts Transfer Solution (*Wireless*) is designed to reduce labor cost and increase accuracy during the process of transferring parts from one warehouse to another. There are many companies that can benefit from creating multiple warehouses to track inventory. Re: Delivery Trucks, Work Flow Rooms, Remote Warehouses, Front Counter Store Fronts etc.

Typical Procedure

- On the scanner Choose the warehouse you will transfer from (*this can be set as a default*) and the warehouse you are transferring to.
- Scan the part that is being transferred to the other warehouse. (*Physical Warehouse, Room, Delivery Truck or Salesman's trunk.*)
- Enter the number of the part being transferred or push a *HOTKEY* to accept "1".
- The transfer is complete.
- At this time the SAGE BusinessWorks Inventory Control module has been updated, all reports will show the new inventory quantities by warehouse and you can run IC Transaction reports to verify the transfers if desired.
- All transfer files are also archived by day folders in case you need to verify a transaction.

No more hand entry of inventory transfers, no more errors and greatly reduced labor costs.
